Moblize launches Witsml compliant Kanak3.0^{Enterprise} software to enable Real-Time Integrated Operations Centers for Digital Oilfields of the future.

Houston, TX, October 2nd 2007- Moblize, an innovator in next generation real time surveillance technologies for the digital oilfields of the future today announced the official release of the Witsml compliant Kanak3.0 software to enable Real time Integrated Operations Centers (RTOCs) for operators like Chevron, Exxon Mobil, BP, Conoco etc. and Energy Service companies like Schlumberger, Halliburton, Weatherford and others.

Simply put, it can sit at the field site, or office, aggregate data from multiple individual applications like SCADA, Well loggers, PLC, RTU and EFM's simultaneously, and then deliver it in real time to any 3rd party surveillance and decision support applications, such as those offered by Schlumberger, Halliburton, Weatherford and others.

Kanak3.0 software merges technology, human element and work processes to help you run your "Fields a Factory" in real time a key for Digital oilfields of the future. This in turn, leads to better and faster decisions. It helps you collaborate between people across various disciplines, various locations, access real time relevant data via web and use any vendor software tool to perform real time analysis and modeling.

"Business impact of Real time Integrated Operations Centers in place today is significant" says Mr. Amit Mehta, Principal Moblize. "Numbers don't lie and CERA analysis on implementation of Real time Integrated centers reveal the following: **2-10%** increase in production rate, **2-6%** increase in reservoir recovery, **15%** reduction in operating costs. We already have over 100 plus real time centers in drilling market and 10 plus in production and counting, he further added.

About Moblize

Moblize is a leading provider of Advisory Services and remote sensor to web surveillance solutions that help clients connect people, systems with any remote assets type fixed or mobile. The company operates two service lines, Moblize Advisory Services which specializes in helping clients select/build/deploy/evolve "Best of Breed" end-end solutions to effectively manage their mobile workers, their work and fixed/mobile remote assets, Moblize Product Group supplies a range of real time technologies from sensor to web based managed services to enable variance reporting, exception reporting, proactive work identification and work efficiency improvement. We are currently working with companies in mining, industrial, commercial fleet and oil and gas industry.
